Kinds of Conflict and Moral Dilemma

OBJECTIVES

At the end of the lesson, the learners are expected to:

1. Identify and analyze common moral dilemmas.
2. Examine various scenarios that present a moral dilemma.
3. Understand the ethical principles involved, and analyze the conflicts between competing values or duties.
4. Evaluate different ethical frameworks by exploring how different ethical theories (such as utilitarianism, deontology, and virtue ethics) approach and resolve moral dilemmas, and assess their strengths and limitations in practical situations.
5. Develop critical thinking and decision-making skills by enhancing students' ability to critically evaluate moral choices and make well-reasoned decisions by considering the implications of various actions, potential outcomes, and ethical considerations involved in a moral dilemma.

CONFLICT

A **conflict** is a struggle between people which may be physical, or between **conflicting** ideas.

Conflicts can either be within one person; or they can involve several people or groups.

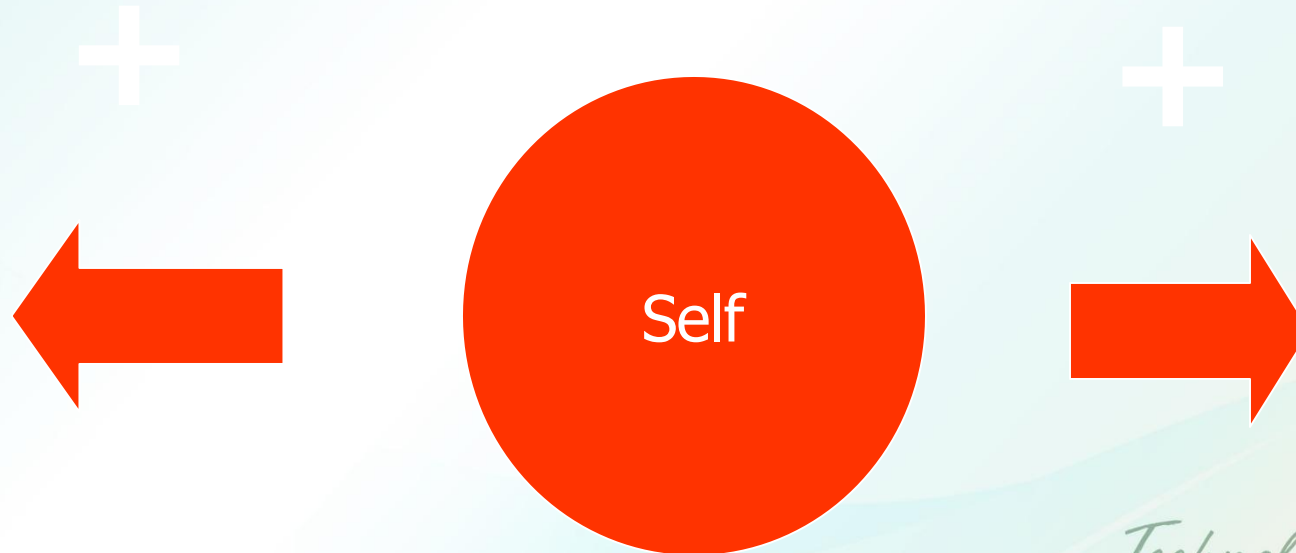

Basis of conflict may also be racial, class, caste, political and international.

KINDS OF CONFLICT

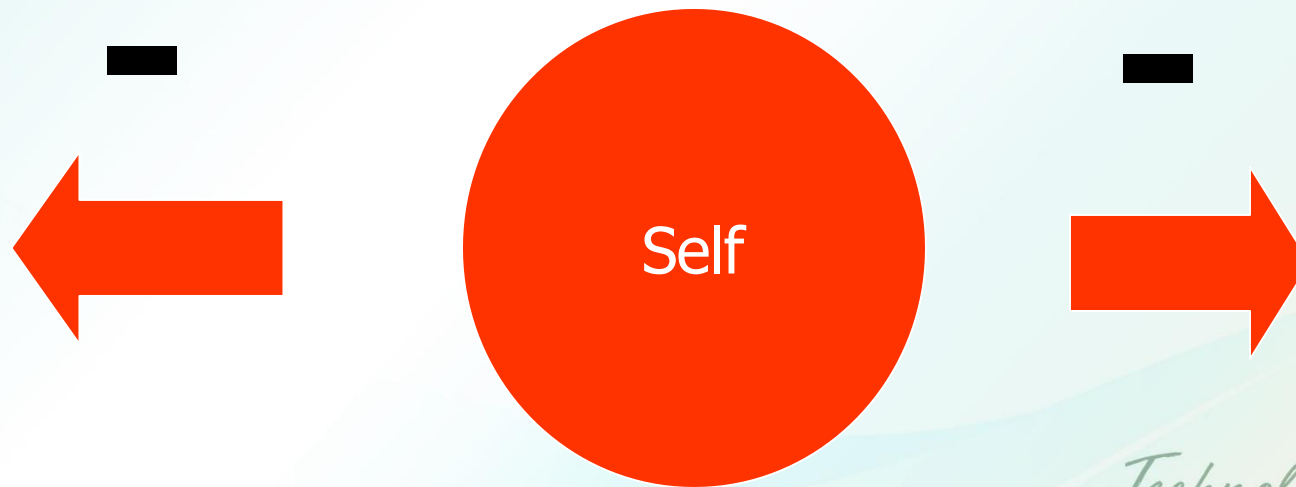

1. APPROACH-APPROACH CONFLICT

- The approach-approach conflict is when there's conflict within a person where he or she needs to decide between two appealing goals. The conflict is typically resolved when there is a movement towards one of the goals.

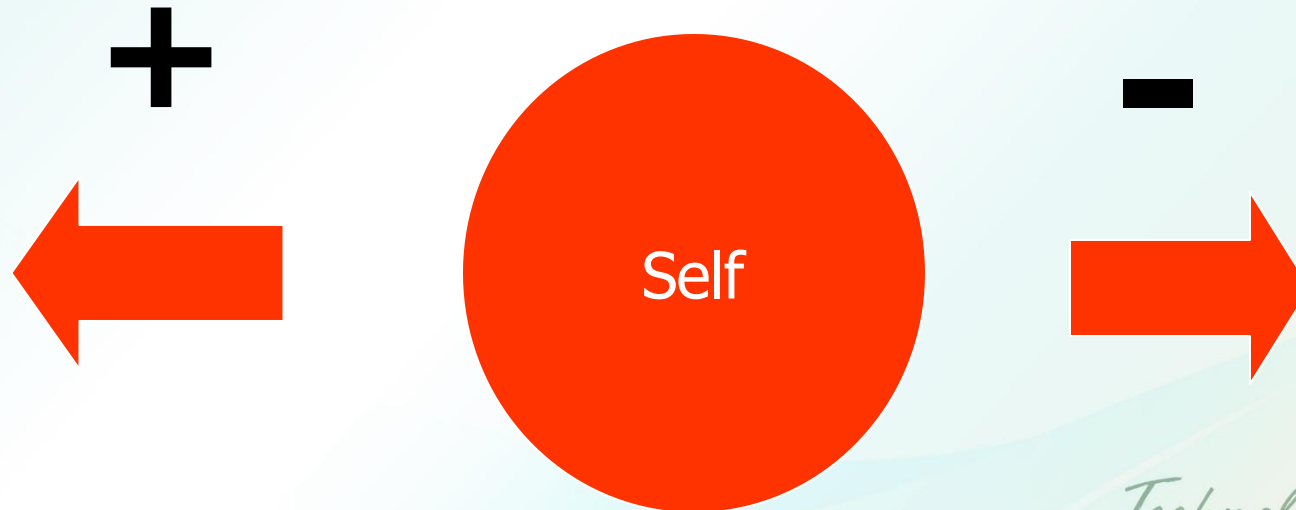

• 2. AVOIDANCE-AVOIDANCE CONFLICT

- The avoidance-avoidance conflict refers to deciding between two equally undesirable choices. A simple example of this could be deciding between doing a homework assignment or doing housework.

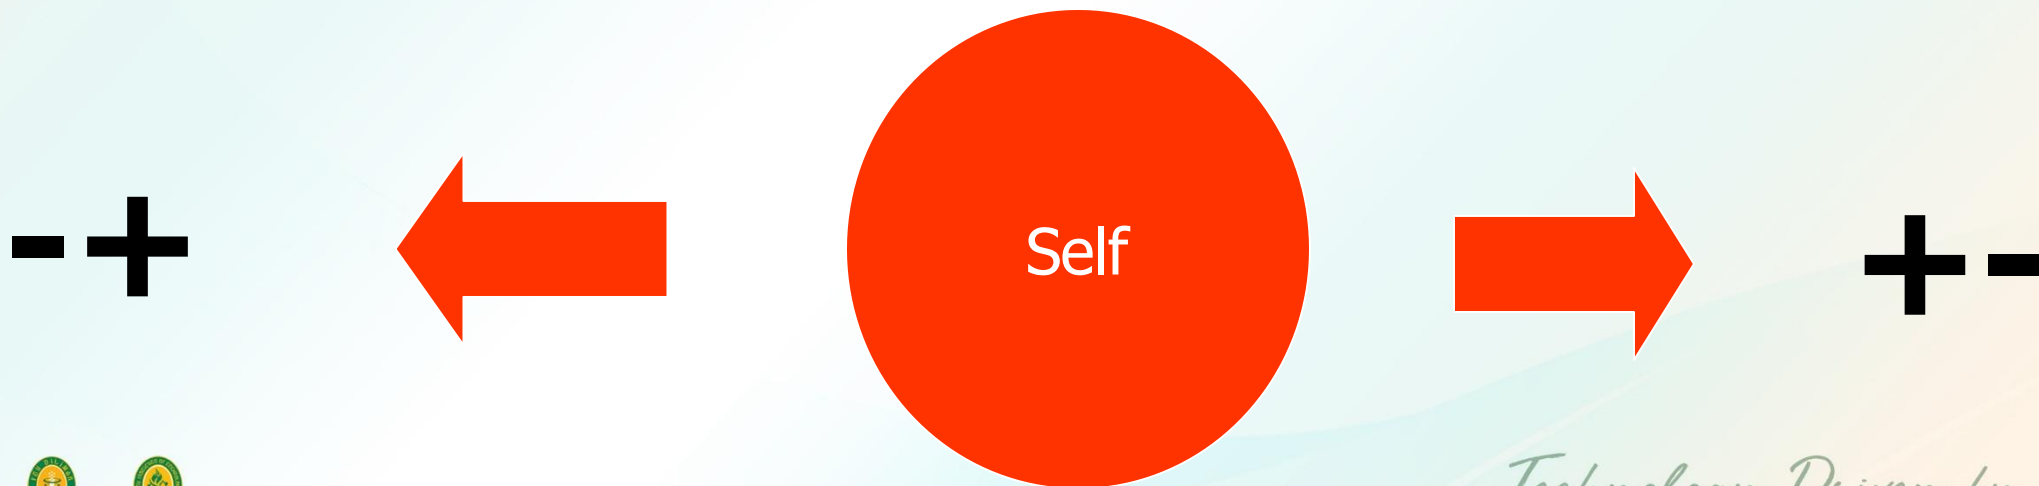

• 3. APPROACH-AVOIDANCE CONFLICT

- It occurs when there is one goal or event that has both positive and negative effects or characteristics that make the goal appealing and unappealing simultaneously. For example, marriage is a momentous decision that has both positive and negative aspects.

• 4. DOUBLE APPROACH-AVOIDANCE CONFLICT

- In real life, the individual frequently is faced with having to choose between two (or more) goals, each of which has both attracting and repelling aspects. Since the tendency is to approach and avoid each of the goals, this pattern is called double approach-avoidance.

LEVELS OF CONFLICT

SOCIAL CONFLICT

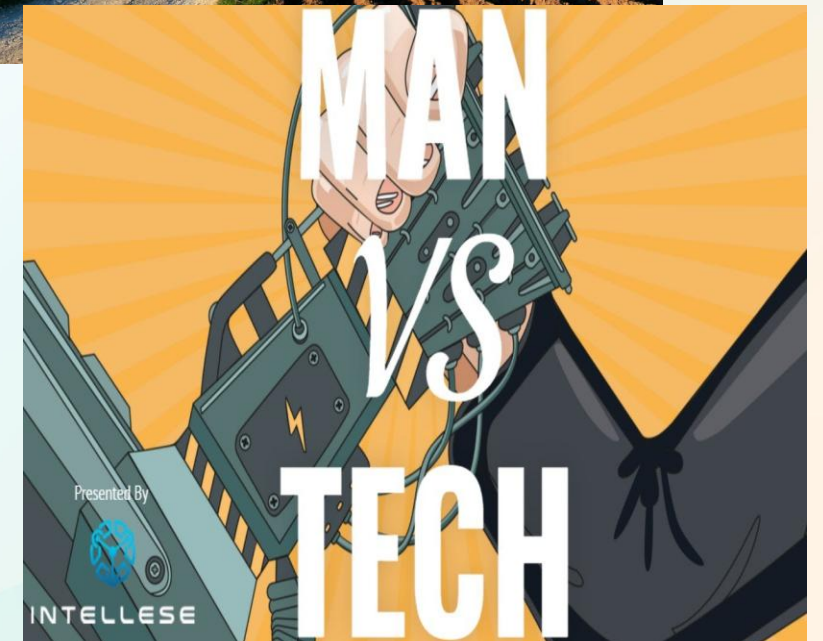

Result from social conditions of that have to do with relations with people.

NON-SOCIAL CONFLICT

Does not involve direct interactions between people or groups.

Arise from conditions beyond your help.

Technology Driven by Innovation

PERSONAL CONFLICT

Related to personal circumstances of attribution, such as values, goals, emotions, or personality.

INTERNAL CONFLICT

Occurs in the mind of the person, such as an inability to make up one's mind regarding something.

INTERPERSONAL CONFLICT

It occurs when two people have incompatible needs, goals, or approaches in their relationship.

Ineffective
Communication

Personality Clashes

Lack of Trust

Varying Interests

Incompatible Goals

ROLE CONFLICT

It involves very real differences in role definitions, expectations, or responsibilities between individuals who are interdependent in a social system.

Role Conflict

A situation in which different roles lead to conflicting expectations

7-15

INTERGROUP CONFLICT

It occurs between collections of people, such as ethnic or racial groups, departments or levels of decision making in the same organization, and union and management.

MULTI-PARTY CONFLICT

It occurs in societies when different interest groups and organizations have varying priorities over resource management and policy development.

INTERNATIONAL CONFLICT

It occurs between states at the global level.

SOURCES OF CONFLICT

SOCIAL
DILEMMA

COMPETITION

PERCEIVED
INJUSTICE

MISPERCEPTION

NORMATIVE CONFLICT

Arises when multiple plausible rules exist, specifying how one should behave in a given situation. In such cases, enforcing one normative rule can lead to a sequence of mutual retaliatory sanctions, which we refer to as a **feud**.
